

Ladder Radiators

Product description: a ladder radiator consists of a steel tube with an electric heating insert designed to be mounted on a wall mainly in bathrooms - it is suitable for drying towels as well as heating. Radiators are supplied assembled, filled with anti-freezing liquid and equipped with a power supply cord finished with a socket plug.

Product overview:

- **TP-03 PRIMO Ladder Radiator**
with its elegant, subtle look, connecting heating and drying functions, it adds comfort and cosy heat to the atmosphere of your bathroom. The construction consists of horizontal \varnothing 20 mm steel tubes and two vertical D-shape steel posts with dimensions 35 x 41 mm.
- **TR-03 RONDO Ladder Radiator**
is based on the basic TP... radiator type where the horizontal tubing is rounded in full length creating a symmetrical curve in the space. The construction consists of horizontal slightly deflected \varnothing 20 mm steel tubes and two vertical D-shape steel posts with dimensions 35 x 41 mm.

Ladder Radiators TP

Type	Dimensions (mm)	Depth (mm)	Input (W)	Weight (kg)
TP-03-500.1160 E	500 x 1160	85	400	11,5
TP-03-600.1160 E	600 x 1160		400	13,0
TP-03-500.1424 E	500 x 1424		500	15,8
TP-03-600.1424 E	600 x 1424		600	17,8
TP-03-750.1732 E	750 x 1732		800	27,0

Ladder Radiators TR

Type	Dimensions (mm)	Depth (mm)	Input (W)	Weight (kg)
TR-03-500.1160 E	500 x 1160	105	400	11,5
TR-03-600.1160 E	600 x 1160		400	13,0
TR-03-500.1424 E	500 x 1424		500	15,8
TR-03-600.1424 E	600 x 1424		600	17,8
TR-03-750.1732 E	750 x 1732		800	27,0
